March 2020 - Present

- Explore new concepts and tools through expert-led lectures and discussions.
- Receive individualised feedback and support from expert instructional team.
- Dive deeper into topics and techniques via independent, pair, and group programming labs.

Personal Profile

I'm a Melbourne based Software Developer. I am often described as a self-motivated person, organised and love working in a team environment. Having gone straight from high school to a software engineering immersive at General Assembly, I know where my passions lay and I can't wait to get started in the tech industry!
